www.dixangus.com

Greetings Friends and Fellow Cattlemen,

We are excited to invite you to our 4th Annual Production Sale at the Heartland Regional Stockyards in Plainville, Kansas on Monday, March 14, 2022.

This year we are offering the best set of bulls that we have ever produced which includes 102 yearlings. In addition, we have 10 stellar registered open heifers with tremendous potential at their next home. There will also be 50 ranch raised commercial replacement heifers.

As we have had the opportunity to watch this set of bulls grow throughout the summer and up until sale time, they have shown us the consistency that we have been striving for as they have more depth of quality as any set we have produced in our history. These guys exhibit all the things we can hope for as they are bred for fertility, soundness, eye-appeal, muscle, rib shape, longevity, docility, performance, and maternal excellence while a majority adds calving ease into the package. This is credited to 20 years of AI as well as 10 years of embryo transfer work in our herd.

All of the bulls and registered females have been carcass ultrasounded as well as genomically tested. The ultrasound data will be available online prior to the sale as well as sale day.

Presale videos should be online at DVAuction.com by March 1st.

To summarize the expectations of the cows that walk the ranch is to say they are to live and produce on what Mother Nature provides. The cows raise these calves on grass and water through the summer, no creep feed. Post weaning, the cows graze winter grass as well as corn and milo stalks up until calving, just like a group of commercial cows. We feel like the true production cows rise to the top in this program and pass these traits on to their offspring.

It would be our pleasure to assist you in finding your next herd bull(s) in this offering, as well as stand behind them with a 1st breeding season guarantee in the event an injury should occur.

Let us know if you have any questions about our program or the bulls in this offering.

Cody Dix

HALEY, MARIANNE, JEFF, CODY, BROOK, CHLOE

DIX ANGUS RANCH

4TH ANNUAL

PRODUCTION SALE MARCH 14, 2022

Heartland Regional Stockyards • Plainville, Kansas • 1 pm

Selling: 100 Yearling Bulls, 10 Elite Registered Heifers, 50 Ranch-raised Commercial open replacement heifers • Call Cody- (785) 476-5168

facebook.com/Dix-Angus-Ranch

SALE LOCATION:

Heartland Regional Stockyards
907 NW 3rd STREET
PLAINVILLE, KS 67663

LUNCH:

Complimentary lunch at 11 A.M.

AUCTIONEER:

Greg Goggins (406) 200-1880

LIVESTOCK PUBLICATION REPRESENTATIVES:

Jeff Mafi- Angus Journal (816) 344-4266
Doug Paul – The Stock Exchange (405) 820-3982
Alan Sears – Western Ag Reporter (970) 396-7521
Stephen Russell – Kansas Stockman (785) 458-2650

SALE DAY PHONES:

Cody Dix: (785) 476-5168
Jeff Dix: (785) 476-5030 or (785) 476-5210

CATTLE VIEWING:

Cattle can be viewed at anytime at the ranch until Saturday prior to the sale. They will be shipped the Heartland Regional Stockyards in Plainville and will be available for viewing, Sunday March 13 and on sale day. Videos of the bulls will be available online at DVAuction.com or dixangus.com

SALE ORDER:

BULLS WILL SELL IN CATALOG ORDER! With the exception we feel there is additional interest in a particular lot or lots to be moved forward in the order.

Commercial Heifers will sell in Groups of 5 Head, Winning Bidder has the option to take as many as desired in increments of 5 Head.

TERMS OF SALE:

Terms are cash. Cattle will sell under the suggested Terms and Conditions of the American Angus Association. All cattle must be paid for in full on sale day. Any announcements from the sale block take precedence over any printed material.

HEALTH:

Interstate health papers will be furnished with every animal selling. A rigid herd health program is followed. All bulls ear-notch and tested negative for PI-BVD and vaccinated against foot rot at time of fertility check.

DELIVERY: Free Delivery on all bulls selling for \$3,000 or more in Kansas and bordering states, outside these parameters will be at cost.

VOLUME DISCOUNT: The purchase of 5 or more bulls by a single buyer will earn a 5% discount.

GENOMICS: All the bulls have been genomically tested with AngusGS as EPDs have been adjusted accordingly. They will all have guaranteed parentage for the sire at minimum.

CARCASS ULTRASOUND: All the registered cattle selling in this offering have been ultrasounded and will have the results posted online as well as the data being available on sale day.

RETAINED INTEREST:

Dix Angus Ranch is retaining 1/3 revenue sharing interest in every bull

ANGUS MEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

AMERICAN ANGUS ASSOCIATION® SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

DIX ANGUS RANCH BULL GUARANTEE

We guarantee that all breeding cattle sold by Dix Angus Ranch are fertile to the best of our knowledge. If at any time during the first breeding season following the sale a bull is injured so as to make them functionally infertile, we will provide you with a satisfactory replacement (if available), or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull. This guarantee is in addition to the Terms and Conditions of the American Angus Association, which also apply.

This is not a life insurance policy. We will not replace or give credit for a dead or incapacitated animal resulting from negligence. We would suggest that normal care still needs to be exercised toward these animals and that particularly the yearling bulls not be allowed to get too thin.

"The 3 factors that drive profitability in the feed yard are Feeding Performance, Grid Performance and Predictability; McClaren's genetics give you all 3 and should complement any cow herd."

*Statement by Keith Bowman,
owner of Wilroads Feed Yard, Dodge City, KS*

The McClaren's have been buying their bulls from us since 2013. It's great to see how well our genetics have been working for them to help them meet the goals of their own program.

"The Best Logo son in the Land," D A R Logo 1287 may be the best bull we've raised to date. He comes from the best cow we've ever had the privilege of walking on the ranch. She has produced a stunning 9@113 for WW and 7@107 for YW. He's not only stacked with multi-generation Pathfinder cows and Top 1% of the breed for Heifer Pregnancy, but he's as powerful and athletic as you can make one; in a calving ease package to boot. He currently has two maternal brothers that are in the BEEF-360 Exclusive Sires lineup. HERD BULL OPPORTUNITY.

D A R Prime 1268 is great at all angles. He's extremely athletic when put into motion and is as wide over his top line as any bull in the offering. His dam has turned in 4@105 for WW production within a 373-day calving interval. In 2018, Gary Stoecker, Oakley, selected 4 flush brothers and 1 maternal half brother to the dam of Prime. Consistency Runs Deep. This bull turned in an impressive 113 RE ratio and a 174 IMF, blowing away his fellow contemporaries. Superb carcass merit with outstanding phenotype!

D A R Bomber 1206 earned the honors to lead off an exceptional sire group by Casino Bomber. Stacked with a maternal pedigree with consistency from the powerful Princess Vel cow family. His dam has turned in a WW ratio record of 7@106, while being the maternal sister to Hindquarter and Stockton who are both BEEF-360 Exclusive Sires. His dam, Z88, also produced the top-selling bull in our 2020 sale, D A R Propel T085, who has been used back heavily in our program as well as his owners', Molitor Angus. 3rd highest Marbling EPD in the offering.

D A R Bomber 1209 is one of the true curve-bender bulls of the day. His double-digit CED, sub-zero BW and stellar growth performance lands him as the #4 overall \$W bull in the sale. His perfect uddered 4-year-old dam is off to an astounding start with a BW record of 2@92 and WWR 2@107. His maternal granddam has turned in 6@106 for weaning and maternal great-granddam 8@114. His dam Irene S847 stems back to the original heifer we started the program around, and is a full sister to the famous "Eric" bull working for Bar D Ranch.

Another sleep-all-night heifer bull by High Roller. 1271 is a smooth-made, neat designed bull that ranks #1 for BW in this offering. Longevity built with tremendous maternal performance as his Pathfinder dam has produced 7 calves to average 109 for weaning in an average calving interval of 366 days. His maternal granddam posted 8@116 in a 370-day calving interval. Heifer bull deluxe.

This Turbo son shows off some of the same features that his paternal half-brother D A R Propel T085, who topped the 2020 sale, did at his age from a phenotypic standpoint. 1319 was produced by the first Logo daughter to calve on our ranch and she did a stellar job by turning in a 620 lb. calf at weaning.

D A R Maxine 1114 is a special opportunity as we don't let many of the P104 daughters leave the ranch, but we've decided to put these genetics up for offering. She spreads the EPD chart quite well from BW to YW, then has a +1.06 Marbling EPD. Modest in her frame, easy fleshing, deep bodied female with a feminine front end on her. Potential Donor.

Here's another stellar female from the Maxine cow family. Her dam is a flush sister to D A R Turbo R146, which sired the top-selling bull in 2020 to Molitor Angus and is being used back in our herd as well. She's also turned in 2 calves to average 106 for WW. This Entice daughter appears to have a lot of future.

This will be the only Bomber daughter we are going to let go of and she's got the look to do some folks a lot of good moving forward. Her dam is from a flush that the bulls were sale favorites in 2019.

DIX ANGUS RANCH COMMERCIAL HEIFERS

These heifers are 100% home raised. They have all been OCV'd and had all their pre-breeding vaccinations. These are the top end of our commercial heifers as we did not retain any commercial replacements for ourselves. These are a great opportunity to bring good maternal genetics into your herd. "These will sell in 5 Head groups, and the winning bidder will have the option to buy all the heifers of their desire in 5 head increments"

Stockton was selected by BEEF-360 in the 2021. He excelled against his contemporaries and was one of the highest-performing bulls of the set. Stockton is an extremely gentle, good footed bull that will sire added frame, growth and carcass, but most importantly improve the cowherd at the same time. With Elite projections for Scrotal (top 2%) and Heifer Pregnancy (top 1%), Stockton will leave you a more functional, fertile set of cattle. Excelling on his indexes and the promise of high-performing, high quality cattle, Stockton deserves to be on your short list of young sires to sample in 2022!
