Greetings Friends and Fellow Cattlemen,

We would like to invite you to the ranch to our private treaty sale BEGINNING on March 1, 2017. We have an offering of 72 bulls this year consisting of 10 two-year-old and 62 yearling bulls. These bulls have been performance and genomically tested (Zoetis i50k). They have also all passed their breeding soundness exam. We record all the data on our bulls to offer you the highest accuracy possible for each trait.

We breed cattle to provide the "Total Package" animal that calves easily, grows rapidly, instills outstanding maternal ability, and is appealing to the eye of fellow producers. Structural soundness and fertility is of utmost importance in our breeding selection, as well as docility for easy handling. In addition, we feel that our cattle will perform in the feed yard and carry traits of carcass merit to the rail.

In order to meet our genetic goals and deliver them to you, we have hand-selected a group of AI Sires and donor cows. You can find the donor cows in the "Dix Angus Ranch Donors" section, located in the back of the sale book. Furthermore, we have made intensive selections in our AI and ET programs and our set of pasture sires to add genetic consistency. This year we offer our first set of bulls from Sitz Investment 648B and HARB Hindquarter 473 JH.

You will find our premium bulls in the Midland Bull Test section of the sale book on the following page. These 13 particular bulls are the standouts of the 2016 calf crop. The Midland sale will take place April 7, 2017 at the Midland Bull Test Facility located near Columbus, MT. There are several herd sire potentials among this group. We would be glad to assist you with the delivery of these bulls too.

It would be our pleasure to accommodate you at the ranch to find your future herd bull. The dams of these bulls are accessible if interested and we'd be glad to take you out to see them. Dix Angus Ranch stands behind our product and carries a first breeding season guarantee, which you can find in detail on the next page.

Give us a call at (785) 476-5168 to set up a time to find your next herd bull.

Cody & Jeff Dix

General Information

Private Treaty sale begins March 1, 2017

Selling 62 Yearling and 10 Two-Year-Old Bulls

Dix Angus Ranch Bull Guarantee

We guarantee that all breeding cattle sold by Dix Angus Ranch are fertile to the best of our knowledge. If at any time during the first breeding season following the sale a bull is injured so as to make them functionally infertile, we will provide you with a satisfactory replacement (if available), or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull. This guarantee in addition to the Terms and Conditions of the American Angus Association, which also apply.

This is not a life insurance policy. We will not replace or give credit for a dead or incapacitated animal resulting from negligence. We would suggest that normal care still needs to be exercised toward these animals and that particularly the yearling bulls not be allowed to get too thin.

Directions to Dix Angus Ranch

From Stockton:

Travel 9 miles East to Woodston, turn North on Spruce St/ 28 Road (blacktop road), travel 5.7 miles, turn West onto C Road, Travel 1 mile West (rock road), Turn North on 26 Road for 1/4 mile, Dix Angus on the left.

From US-36 Highway:

At Agra turn South onto CR-529, travel South through Kirwin for 15 miles, turn West onto C Road, travel 1 mile West (rock road), turn North on 26 Road for 1/4 mil, Dix Angus on the right.

ANGUS MEDIA

Visit the *Angus Journal* Website, www.angus.media, and view this sale book online. References: American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder® EPDs current as of January 23, 2017. Updated EPDs can be viewed at www.angus.org.

Thank you for your interest in Dix Angus Cattle!

Free Delivery to Kansas and bordering states.

Pictures and videos of the bulls can be found at dixangus.com

Blazin Start Q800 is the lead-off bull in our Midland Bull Test group for a reason. Q800 has been a standout from day one. His moderate frame, perfect uddered dam, sired by the 2012 Midland graduate, Upstart, posts BR 2@95, WR 2@108, YR 1@101. He is an outstanding choice to add true calving ease, performance, maternal, and phenotype in one package.

8N Upstart - Maternal grandsire of Lot 570.

X-Treme P236 was a younger bull in the pen last year to give you a second chance this year. He is out of one of the stoutest made cows in the herd, L526, which is last natural born calf from the great Molitor 1047 cow. Recommended for Cows.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 7-24 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD).

EF X-Tensive 5082 - ONE OF TEN X's BEST SONS!!!

X-Tensive is the newest and most exciting addition to our herd sire battery. His grandam's, SandPoint Blackbird 8809, track record is unparalleled as her progeny have exceeded \$4 Million over the past 5 years on only 40 head. X-Tensive has it all from pedigree to performance to phenotype. Don't miss your chance to be one of the first to add his attributes into your herd.
